6:30PM

Presentation commences

7:00PM

Presentation Dinner

QMRS Welcome

61ST AUSTRALIAN MINES RESCUE COMPETITION

On behalf of Queensland Mines Rescue Service, I would like to respectfully acknowledge the Barada Barna people, the Traditional Custodians and First Peoples of the land on which this competition is being held. I pay my respects to their Elders past and present, and I extend that respect to any Indigenous people joining us today.

It is my great pleasure to welcome all competitors, sponsors, visitors, and supporters to the 61st Australian Mines Rescue Competition, proudly hosted at BMA's Broadmeadow Mine. I want to thank Peter Baker, the Broadmeadow General Manager & SSE, for his support in hosting the competition.

This year, teams from New South Wales and Queensland will once again compete at the highest level of mines rescue. Under the direction of the Chief Assessor and his team, a series of challenging, real-life scenarios have been designed. These will test not only the technical skills and experience each team has developed through extensive training, but also the teamwork, resilience, and decision-making that lie at the heart of effective mines rescue.

We are also honoured to welcome Maron Chongo from Zambia who is here to gain valuable insights into how a national competition is structured, knowledge Maron can take back to support the future of mines rescue in their own country.

While only one team can finish in first place, every competitor will walk away with more than just results. Each will return to their workplace and community as a stronger rescuer, a stronger teammate, and a stronger individual – enriched by the lessons, challenges, and camaraderie of this competition.

I want to extend my sincere gratitude to the QMRS staff, our volunteer district assessors, patients, and helpers. Your dedication, professionalism, and generosity of time and effort make events like this possible, and it is through your commitment that the competition continues to be such a success.

Best wishes to all competitors. I warmly welcome you all to this year's competition, and I look forward to seeing your skills and spirit on display.

TIM JACKSON

Chief Executive Officer
Qld Mines Rescue Service Limited

Coal Services Welcome

On behalf of Coal Services, NSW Mines Rescue is proud to join with the Queensland Mines Rescue Service in welcoming you to the 61st Australian Underground Mines Rescue Competition.

Every day, our highly skilled mines rescue brigades play a pivotal role in upholding the standards that contribute to incident prevention. Their specialised knowledge and expertise are essential in maintaining a safer working environment for everyone in the industry.

We are grateful that the number of major incidents requiring Mines Rescue and brigades response is limited which is a testament to the strong safety culture embraced by the mining community. Unfortunately, incidents still occur, making it vital that we continue to train, test and sharpen our skills in preparation for any emergency situation.

Mines Rescue competitions provide a valuable opportunity to do just that, forming a crucial part of ongoing Mines Rescue training. Today's event is the culmination of extensive planning, designed to present realistic and challenging scenarios that test each team's abilities.

I would like to especially thank the organising committee and the many volunteers whose efforts have made today possible. We also extend our gratitude to the BHP Mitsubishi Alliance for generously hosting this event at their Broadmeadow Mine.

Congratulations to all participants for your dedication and hard work. Thank you for your ongoing commitment to Mines Rescue and the safety of our industry.

LACHLAN GRANT

State Operations Manager
NSW Mines Rescue

Broadmeadow Mine Welcome

I would like to welcome to all competitors, company representatives, members of government, RSHQ and our local community to Broadmeadow Mine. We are thrilled to be hosting you for the 61st National Mines Rescue competition.

This event symbolises an important moment for our industry. It showcases the exceptional skills, teamwork, and commitment of our mines rescue teams, who play such a vital role in keeping our people and communities safe. Through competitions like this, we not only strengthen technical expertise and problem-solving under pressure but also build resilience and collaboration across sites and teams.

We deeply appreciate the dedication and professionalism of our teams. Their training, courage and, and readiness to act in the most challenging circumstances make an extraordinary difference. Today is about recognising and celebrating that commitment. Furthermore, I recognise that it is through the shared common ground of Mines Rescue, that we build relationships across the industry, help each other out in times of need, and shake hands across mining leases.

Thank you all for your contributions to the success of these events, and best of luck to all competitors.

PETER BAKER

General Manager
Broadmeadow Mine

61ST AUSTRALIAN COMPETITION

COMPETING TEAMS

Southern Mines Rescue:

Robert Monkley
James Sproates
Ben Oxenbridge
Rod Powell
Aaron Donnelly
Brad Davidson
Pokaia Matthews

Hunter Valley Mines Rescue:

Simtars

**Proudly serving the Queensland resources sector
and allied industries for over 30 years**

Emergency Response

Simtars maintains an emergency response team capable of providing expert assistance to underground coal mines.

The emergency response team is on-call 24/7 and can provide the following at short notice in an emergency.

- Simtars mobile laboratory containing a 20 point tube bundle system
- GC with all necessary carrier and calibration gases
- Gas chemists to run the GCs, trend and interpret data
- Experienced engineers in underground coal mining techniques
- Remote support until equipment has been received at the mine

Mine Safety Technology Specialist Services

Simtars offers a range of specialist services to mining and related industries. Our team of experienced engineers, gas chemists and software engineers can provide specialist services including:

- Emergency exercise planning and facilitation
- Gas simulations for mining emergency exercises
- Level 2 exercises at individual mine sites
- Coal spontaneous combustion management advice
- Gas monitoring compliance audits
- Gas analysis for incident investigations
- Safety management plan reviews and audits
- Technical and scientific input to risk assessments
- Specialist control system programming

Gas monitoring and consulting services

Simtars is your one-stop-shop for mine gas monitoring systems and specialist advice. We offer turnkey mine gas monitoring solutions incorporating our Safegas, Segas Professional and Camgas systems, as well as a range of specialist gas consulting services

Our industry experts deliver world class health and safety training, research and testing services for your business and employees. Please call +61 7 3810 6333, email us on enquiries@simtars.qld.gov.au or visit www.simtars.qld.gov.au for more information.

MORE THAN MEETS THE EYE

Lunar Mining is a specialist provider of underground Coal Mining services. We are committed to delivering value and sustainability through safe, professional, and productive services.

Recruitment & Workforce // Ventilation Services // Secondary Support //
Labour Hire // Project Management // Longwall Relocation & Overhaul //
Pre-Driven Recovery Roads // Conveyor Installation, Maintenance &
Structure Refurbishment // Equipment Hire // MTT Timber Supply
