Presentation Dinner

21st Memorial Cup

QMRS Welcome

On behalf of Queensland Mines Rescue Service, I would like to respectfully acknowledge the Barada Barna people, who are the traditional custodians and first people of the land on which this competition is being held. I would like to pay my respects to the elders, past and present, and extend my respect to any indigenous people who may be present at the competition.

I welcome all visitors, supporters and competitors to our 21st Memorial Cup Mines Rescue Competition, which is being held at our QMRS Dysart Rescue Station

The Team Members in the Memorial Cup Competition will be able to demonstrate their ability to respond to several challenging scenarios they may face in the future. With their skills, experience & teamwork, they will, at the end of the competition, not just be a better team but better individuals who can take the learnings back into their communities. The top four teams will have the opportunity to compete in the State Rescue Competition, to be held on the 13th August at a venue to be advised.

I would like to extend my gratitude to the QMRS staff and District Assessors for their efforts in preparing this Competition, and to others who have assisted in delivering this event. It's through your dedication and willingness to contribute that these events are a success.

Best wishes to all competitors and a warm welcome to you all.

Tim Jackson

Chief Executive Officer
Qld Mines Rescue Service Limited

Competing Teams

OAKY NORTH

Sam Lindley - Captain
Robert McShane - Vice Captain
Leslie Healy
Coleman Roberts
Benjamin Ormsby
Hudson Jeffrey
Dakotah Richardson
Corey Hoskins

AQUILA

Nicholas Doherty - Captain
Carl Schultz - Vice Captain

A Message From **QMRS**

The Board of Directors, Management and Staff of Queensland Mines Rescue Service would sincerely like to thank the following valuable sponsors:

- **FRSA**
- **3M**
- **Dräger**
- **Fire Response**
- **Performance Training**
- **MSA**
- **PIP**
- **Simtars**
- **Blackwoods**
- **Lunar Mining**

A special thank you is extended to:

The Management and Staff of QMRS, Competitors, Assessors, Team Marshalls, Patients, Assistants and Supporters.

IN MEMORY OF

GEORGE CARBINE

As a young man in Ipswich after completing his carpentry apprenticeship and experiencing a downturn in the building industry, George went to work with his father Athol Carbine at Westfalen Collieries in 1976. He became a union delegate as was his dad and worked side by side with miners who had each other's backs and developed a tightly knitted brotherhood with his co-workers. George went on to work at Rhond Collieries and Haenke mine as well.

Never one to shirk responsibility, George joined the Mines Rescue team while working in the Ipswich mines. The first aid experience here developed further and eventually George went to work for the Ipswich Ambulance.

In 1989 George moved to Middlemount to fill the position of Emergency Service Officer for Capcoal and continued his interest in community assistance. He was a volunteer member of the SES and continued as an honorary ambulance officer as well as being a mines rescue member.

During the years of 1989 and 1994, George managed award winning teams throughout the mines rescue competitions. Upon his death in 1994, the inaugural George Carbine Cup was initiated in honour of his lifelong service to the industry.

RAMSAY WELLS

15/12/1965 – 07/06/2020

Rambo, perhaps we should start with some adjectives. Mate, confidant, visionary, entrepreneur, passionate, anyone that has met Ramsay has their own list and memories. Ramsay had many passions, family, finance, helping others and mines rescue. Rambo came to QMRS in March of 2012, but that was just another chapter in his rescue life, he had rescue in his heart and could not do enough or go to any length to assist, weather it was driving across the state to make sure a part was where it needed to be or cajoling a supplier to get something for nothing.

Ramsay was also heavily involved with the emergency services community and was always offering his expertise and assistance with emergency response across Queensland. He was involved with the Brisbane flood recovery using his contacts to make life just that little bit better for the residents in their time of need. During the QMRS deployment to Pike River Ramsay made sure all the team members were able to depart and return home during the flooding events in Central Queensland at the time. Firefighting equipment and technology was his passion and he enjoyed sharing his knowledge and experience with all who had time to listen.

Ramsay joined the QMRS as the “Business Manager”, I do not think that there was a position description, he could work out the details on the fly. He did influence an organisation that tended to be quite conservative in becoming a forward-thinking world-class Mines Rescue Body effecting all levels of rescue response.

To say there was always a story with Ramsay would be an understatement, I don't think that there was a topic that he hadn't done or invested in. The amazing thing is that in discussions with people from all walks and arenas they will tell you the same story and you find out that he has downplayed his part.

Thinking about something that Ramsay will be remembered for by the QMRS community, I initially thought of the infrastructure and major projects that he achieved in his far too short tenure with us. I truly believe that the greatest legacy that Ramsay has left us is his ability for unreserved friendship and his stewardship of life.

International Mines Rescue Competition

Moving forward the selection criteria is as listed below

QMRS minesite teams wanting to compete at the International Mines Rescue Competition – Qualification to represent QMRS at the International Competition is granted to the best placed QMRS team the year before, from the Australian Mines Rescue Competition and not 2 years prior (this team can nominate for the waiting position with the IMRC).

As the Australian is scheduled in October and IMRC is predominately scheduled in September, the best placed QMRS team for example 2024 will not be automatically granted the spot, the best placed QMRS team 2025 will be granted the invitation, for the scheduled IMRC 2026 event and rolls over from there biannually.

This scenario works very well in sporting arena, when a team must qualify for the Olympics/World Championships, leading into the main event & has the chance to represent their country, not a team from 2, 3 years prior.

Severe Duty Mining Equipment, On-site Testing, Fluorine Free Foam

Specialising in Portable Monitors, One Seven CAFS, Foam Eductors, Accessories and more.

When was the last time you tested your foam proportioning equipment?

Our on-site foam testing ensures your fire suppression systems offer effective fire response and risk mitigation. We assess foam quality, proportioning accuracy, application rates, and system performance for reliability and compliance.

As the authorised Australian representative for One Seven CAFS, we deliver advanced foam solutions with faster knockdown and improved efficiency.

Contact us to learn more.

Portable Monitors by AWG & Akron Brass

Portable, easy to operate firefighting solutions with unmatched performance.

Firefighting Nozzles & Hoses

Trusted the world over for operational flexibility, stream performance and flow control.

One Seven Compressed Air Foam Systems

Goaf Foam Generator - industry-leading Compressed Air Foam System (CAFS).

Emergency Response

Simtars maintains an emergency response team capable of providing expert assistance to underground coal mines

The emergency response team is on-call 24/7 and can provide the following at short notice in an emergency

- Simtars mobile laboratory containing a 20 point tube bundle system
- GC with all necessary carrier and calibration gases
- Gas chemists to run the GCs, trend and interpret data
- Experienced engineers in underground coal mining techniques
- Remote support until equipment has been received at the mine

Mine Safety Technology Specialist Services

Simtars offers a range of specialist services to mining and related industries. Our team of experienced engineers, gas chemists and software engineers can provide specialist services including:

- Emergency exercise planning and facilitation
- Gas simulations for mining emergency exercises
- Level 2 exercises at individual mine sites
- Coal spontaneous combustion management advice
- Gas monitoring compliance audits
- Gas analysis for incident investigations
- Safety management plan reviews and audits
- Technical and scientific input to risk assessments
- Specialist control system programming

Gas monitoring and consulting services

Simtars is your one-stop-shop for mine gas monitoring systems and specialist advice. We offer turnkey mine gas monitoring solutions incorporating our Safegas, Segas Professional and Camgas systems, as well as a range of specialist gas consulting services
