6:30PM

Presentation commences

7:00PM

Presentation Dinner

55th Queensland State Cup

QMRS Welcome

Welcome to all.

On behalf of Queensland Mines Rescue Service, I would like to respectfully acknowledge the Barada Barna people, who are the traditional custodians and first people of the land on which this competition is being held. I would like to pay my respects to the elders, past and present, and extend my respect to any indigenous people who may be present at the competition.

I welcome all visitors, supporters and competitors to our 55th QMRS State Mines Rescue Competition, which is being held at ARGO Natural Resources Carborough Downs Mine.

The Team Members in the State Mines Rescue Competition will be able to demonstrate their ability to respond to several challenging scenarios they may face in the future. With their skills, experience & teamwork, they will, at the end of the competition, not just be a better team but better individuals who can take the learnings back into their communities. The top four teams will have the opportunity to compete in the Australian Rescue Competition, to be held on the 22nd of October at Ashton Mine in Hunter Valley NSW.

I would like to extend my gratitude to ARGO Natural Resources, Marc Kirsten, Carborough Downs, SSE, QMRS staff and District Assessors for their efforts in preparing this competition, and to others who have assisted in delivering this event. It's through your dedication and willingness to contribute that these events are a success.

Best wishes to all competitors and a warm welcome to you all.

Tim Jackson

Chief Executive Officer
Qld Mines Rescue Service Limited

55th Queensland State Cup

Argo Natural Resources Welcome

I am thrilled to extend a heartfelt warm welcome to all the competing teams, competition assessors, dignitaries and guest to the 55th Annual Qld State Mines Rescue Cup proudly hosted by Carborough Downs Coal Mine.

Carborough Downs previously hosted the State Cup in 2023 but this year is very unique for Argo Natural Resources as it enters its two teams (Carborough Downs & Ironbark No.1) to not only battle it out against each other but, battle it out against Queensland's best mines rescue teams.

I would like to acknowledge the dedication and commitment of each and every competitor in this year's competition. I would also like to acknowledge the hard work and organisation of QMRS staff who provide the opportunity for all rescue teams to come together and compete shoulder to shoulder, against some of the finest mines rescue teams. These competitions allow our rescue teams to safely display the highest level of commitment to safety, rescue and emergency response within the Qld Mining Industry.

There are very few underground coal mines that have not experienced some form of emergency during their lifetime. It is during these times, we rely heavily on the critical thinking and expert skills of our mines rescue personnel. Their passion to help others, dedication and selflessness provides all our employees with the confidence and reassurance that should any emergency arise, they will be the familiar, calming faces ready to safely assist us during these times.

I wish all teams competing the best of luck together with a safe and enjoyable competition.

Marc Kirsten

Competing Teams

Aquila:

Nicholas Doherty (Captain)
Carl Schultz (Vice Captain)
Vincent Fitzgerald
Mitchell Bird
Adam Barnes
Daniel Davies
Guillermo (Will) Pedrosa
Tyrone Sullivan

Broadmeadows:

Garry Nieuwkamp
(Captain)
Luke Addis (Vice Captain)
Anthony Leyshon
Trent Struthers
Samuel Fillingham
Toby Ostler
Luke Bourke

Carborough Downs:

Matthew Harris (Captain)
Kerrod Sulter (Vice Captain)
James Fegatilli
Jack Anderson
Jai Brown
Brent Tokoli
John Borchardt

Grosvenor:

Boyd Buschmann
(Captain)
Glen Perry (Vice Captain)
Mitchell Tull
Kane Ricketts
Jonas Pirak
Michael Morris

Ironbark No. 1:

Thomas McPhail (Captain)
Shay Livermore (Vice
Captain)
Connor Thompson
Paul Hansen
Dean Betts
Kenneth Aveling
Danuel Bell
Luke Davies

Kestrel:

Joel Barnes (Captain)
Samantha Black
(Vice Captain)
Simon Weekley
William Neal
Casey Jelfs
Jason Neal
Matthew Rookwood
Whetu Austin

Moranbah North:

Jason Seaborn (Captain)
Scott Ryan (Vice Captain)
Melissa Shanley
Blake Thompson
Scott Rehbein
Cody Barnes
Riley Mollenhagen
Samuel Dinnie

Oaky North:

Samuel Lindley (Captain)
Robert McShane (Vice
Captain)
Leslie Healy
Coleman Roberts

International Mines Rescue Competition

The selection criteria is as listed below:

QMRS minesite teams wanting to compete at the International Mines Rescue Competition – Qualification to represent QMRS at the International Competition is granted to the best placed QMRS team the year before, from the Australian Mines Rescue Competition and not 2 years prior (this team can nominate for the waiting position with the IMRC).

As the Australian is scheduled in October and IMRC is predominately scheduled in September, the best placed QMRS team for example 2026 will not be automatically granted the spot, the best placed QMRS team 2027 will be granted the invitation, for the scheduled IMRC 2028 event and rolls over from there biannually.

This scenario works very well in sporting arena, when a team must qualify for the Olympics/World Championships, leading into the main event & has the chance to represent their country, not a team from 2, 3 years prior.

3M Science. Applied to Life.™

Learn from **3M™** experts to explore cutting-edge respiratory protection and safety equipment purpose-built for the harsh demands of the mining environment.

Our experts will be on hand to answer questions, showcase products, and demonstrate how 3M is supporting safer, smarter mining operations around the world.

Don't miss your chance to be part of the conversation driving mining forward.

Emergency Response

Simtars maintains an emergency response team capable of providing expert assistance to underground coal mines

The emergency response team is on-call 24/7 and can provide the following at short notice in an emergency

- Simtars mobile laboratory containing a 20-point tube bundle system
- GC with all necessary carrier and calibration gases
- Gas chemists to run the GCs, trend and interpret data
- Interpretation and data of gas evolution or trending indicators of coal self-heating
- Ongoing remote support with our qualified technicians

Mine Safety Technology Specialist Services

Simtars offers a range of specialist services to mining and related industries. Our team of experienced engineers, gas chemists and software engineers can provide specialist services including:

- Quality assurance for GC data
- Gas simulations for mining emergency exercises (including MEMS)
- Coal spontaneous combustion management advice
- Gas monitoring compliance audits
- Gas analysis for incident investigations
- Safety management plan reviews and audits
- Technical and scientific input to risk assessments
- Specialist control system.

Gas monitoring and consulting services

Simtars is your one-stop-shop for mine gas monitoring systems and specialist advice. We offer turnkey mine gas monitoring solutions incorporating our Safegas, Segas Professional and Camgas systems, as well as a range of specialist gas consulting services. Contact us today to discuss your transition to the new SafeGas gas monitoring system.

Our industry experts deliver world class health and safety training, research and testing services for your business and employees. Please call +61 7 3810 6333, email us on enquiries@simtars.qld.gov.au or visit www.simtars.qld.gov.au for more information.

Severe Duty Mining Equipment, On-site Testing, Fluorine Free Foam

Specialising in Portable Monitors, One Seven CAFS, Foam Eductors, Accessories and more.

When was the last time you tested your foam proportioning equipment?

Our on-site foam testing ensures your fire suppression systems offer effective fire response and risk mitigation. We assess foam quality, proportioning accuracy, application rates, and system performance for reliability and compliance.

As the authorised Australian representative for One Seven CAFS, we deliver advanced foam solutions with faster knockdown and improved efficiency.

Contact us to learn more.

Portable Monitors by AWG & Akron Brass

Portable, easy to operate firefighting solutions with unmatched performance.

Firefighting Nozzles & Hoses

Trusted the world over for operational flexibility, stream performance and flow control.

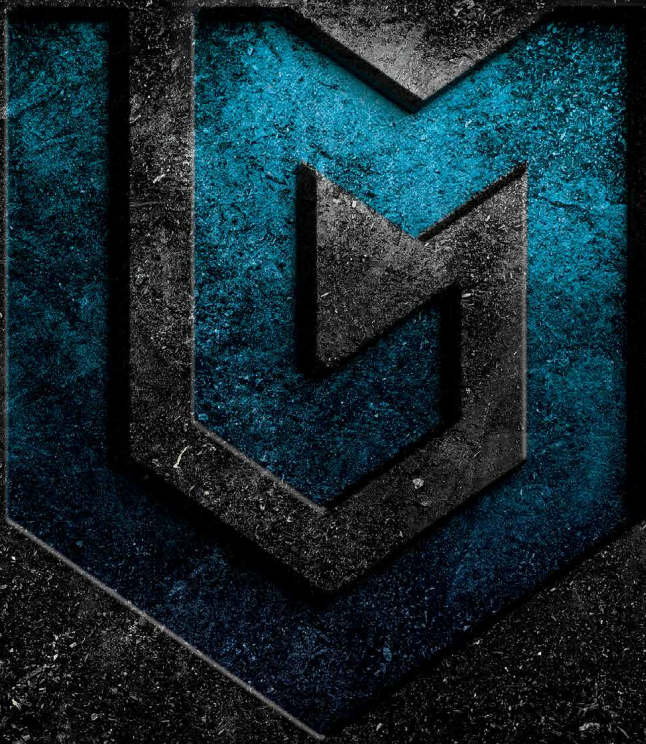

One Seven Compressed Air Foam Systems

Goaf Foam Generator - industry-leading Compressed Air Foam System (CAFS).

MORE THAN MEETS THE EYE

Lunar Mining is a specialist provider of underground Coal Mining services. We are committed to delivering value and sustainability through safe, professional, and productive services.
