2025 Open Cup Challenge

QMRS Welcome

On behalf of Queensland Mines Rescue Service, I would like to respectfully acknowledge the Barada Barna people who are the traditional custodians and first people of the land on which this challenge is being held. I would like to pay my respects to the elders past and present and to extend my respect to any Indigenous people who may be present at the competition.

I would also like to welcome all competitors, sponsors, visitors, and supporters to our 2025 Surface Mines Rescue Challenge, which is being held at BMA's Peak Downs Opencut Coal mine.

The organising committee have developed several scenarios which will enable the ERT team members to demonstrate their capability to respond to any emergency, using their skills they have obtained, their experience and teamwork that has been developed during their training sessions.

I would like to extend my gratitude to the QMRS and Peak Downs staff and the volunteer assessors, patients and helpers for their efforts in preparing this competition and all have provided their time in delivering this event. It's through your dedication and willingness to contribute that makes these events a success.

Best wishes to all competitors and a warm welcome to you all

Tim Jackson

Chief Executive Officer
Qld Mines Rescue Service Limited

2025 Open Cup Challenge

Peak Downs Mine Welcome

On behalf of the entire team at BHP Mitsubishi Alliance (BMA) and Peak Downs Mine, it is my great pleasure to welcome you to the 2025 Queensland Mines Rescue Service Open Cut Challenge.

This is a highlight on the industry calendar - an exciting and invaluable opportunity for our Mines Rescue Teams to come together, test their skills, and strengthen the bonds that unite us. The Challenge not only highlights the technical excellence and readiness of our teams, but also fosters a spirit of camaraderie, innovation, and mutual support that defines the mines rescue community.

I want to begin by recognising the extraordinary dedication of all our Mines Rescue Teams. These volunteers go above and beyond every day to protect their teammates. They are the quiet leaders on every shift - ready, willing, and able to respond when it matters most. Their courage and commitment provide peace of mind to everyone working in our operations.

At Peak Downs, we are proud of our strong safety culture and our commitment to continuous improvement. Hosting this event reflects our shared values and our belief in the power of training, innovation, and community to drive better outcomes for everyone working across Queensland's mining industry.

Over the coming days, I encourage you to make the most of this opportunity to learn from one another, challenge yourselves, and celebrate the teamwork and resilience that define this community. Whether you're competing, supporting, or spectating, your involvement contributes to a safer, stronger, and more connected industry.

Thank you to the Queensland Mines Rescue Service for your leadership, and to all the teams, volunteers, and organisers who have made this event possible. Best of luck to all the teams competing - I look forward to seeing you at Peak Downs and sharing in what promises to be an inspiring and memorable event.

Stay safe,

Mick Thomas

Emergency Response

Simtars maintains an emergency response team capable of providing expert assistance to underground coal mines.

The emergency response team is on-call 24/7 and can provide the following at short notice in an emergency.

- Simtars mobile laboratory containing a 20 point tube bundle system
- GC with all necessary carrier and calibration gases
- Gas chemists to run the GCs, trend and interpret data
- Experienced engineers in underground coal mining techniques
- Remote support until equipment has been received at the mine

Mine Safety Technology Specialist Services

Simtars offers a range of specialist services to mining and related industries. Our team of experienced engineers, gas chemists and software engineers can provide specialist services including:

- Emergency exercise planning and facilitation
- Gas simulations for mining emergency exercises
- Level 2 exercises at individual mine sites
- Coal spontaneous combustion management advice
- Gas monitoring compliance audits
- Gas analysis for incident investigations
- Safety management plan reviews and audits
- Technical and scientific input to risk assessments
- Specialist control system programming

Gas monitoring and consulting services

Simtars is your one-stop-shop for mine gas monitoring systems and specialist advice. We offer turnkey mine gas monitoring solutions incorporating our Safegas, Segas Professional and Camgas systems, as well as a range of specialist gas consulting services
