4th QLD State Cup – Competition Day

Oaky North Mine
Oak Creek Mine Access
Road, Lilyvale QLD 4723

Thursday, 07th August 2025

5:00AM-8:30AM	Breakfast provided on Mine Site
6:00AM	Competition commences
10:30AM-1:00PM	Lunch provided on Mine Site
4:00PM	Competition concludes
6:00PM	Pre Dinner Drinks at Tieri Civic Centre (Malvern Avenue, Tieri QLD 4709)
6:30PM	Presentation commences
7:00PM	Presentation Dinner

4th Queensland State Cup

QMRS Welcome

On behalf of Queensland Mines Rescue Service, I would like to respectfully acknowledge the Western Kangoolu people who are the traditional custodians and first people of the land on which this competition is being held. I would like to pay my respects to the elders past and present and to extend my respect to any Indigenous people who may be present at the competition.

I welcome all competitors, sponsors, visitors, and supporters to our 4th State Cup Mines Rescue Competition, which is being held at Glencore's Oaky North Coal mine.

The Chief Assessor and his team have developed several real-life scenarios which will enable the teams to demonstrate their capability to respond to, using their skills they have obtained, experience and teamwork that has been developed during their training sessions at QMRS.

Not everyone can come first, however, the one thing that all teams have in common at the end of the competition, is they will not just be a better team but better individuals who can take the learnings back into their workplaces and communities.

The top four teams will be given the opportunity to compete in the Australian Rescue Competition to be held on 23rd October at BMA's Broadmeadow coal mine.

I would like to extend my gratitude to the QMRS staff and the volunteer district assessors, assessors, patients and helpers for their efforts in preparing this competition and all have provided their time in delivering this event. It's through your dedication and willingness to contribute that makes these events a success.

Best wishes to all competitors and a warm welcome to you all.

Tim Jackson

Chief Executive Officer
Qld Mines Rescue Service Limited

4th Queensland State Cup

Oaky North Welcome

On behalf of Oaky Creek Coal (OCN), we extend a very warm welcome to all organisers, assessors, competitors and guests to the 4th QLD State Cup Competition proudly hosted by Oaky North Mine.

This is not the first time we've hosted a Mines Rescue competition at Oaky North, and we are thrilled to welcome you all back once again. I have a great belief that the commitment to safety and health in the mining industry is paramount, as we know in our industry, safety never stops – and nor can our commitment to fatality-free operations.

Mine rescue capability further provides the assurance that on the rare occasion that an incident occurs on a mining site, we have the best people in place to respond. Mine rescue personnel are without doubt the most dedicated individuals I have the pleasure of knowing. The absolute commitment to their colleagues in times of significant duress is admirable indeed. It is with awe, pride and gratitude that as a General Manager I am assured that the mining industry is in very safe hands indeed.

We truly hope we never have to see these vital skills in action, but we all know we feel a level of comfort and peace of mind that our mines rescue teams are at the ready should they be needed. We all know, there's nothing quite like an underground mine and the level of trust you put in your teammates to get the job done safely.

These competitions are a fantastic opportunity to recognise these teams for their contribution to the safety of our operations. Beyond this, they're also an opportunity to further hone their skills and training through these emergency exercises which are critically important to making sure our rescue teams are at their highest level of readiness to respond.

I wish all teams good luck competing this year. We at Glencore have a great belief that our Mines Rescue members are leaders in our business, and this is especially true when it comes to safety and emergencies.

I can only hope you all enjoy this opportunity to learn and share your experiences to improve Mines Rescue in this Industry.

Damien Wynn

General Manager
Oaky North Underground

Competing Teams

①

Moranbah North:

Jason Seaborn
Scott Ryan
Melissa Shanley
Blake Thompson
Scott Rehbein
Matthew Gough
Troy Williams
Cody Barnes

②

Oaky North:

Robert McShane
Matthew Fitzpatrick
Leslie Healy
Samuel Lindley
Benjamin Ormsby
Corey Hoskins
Coleman Roberts

③

Broadmeadows:

Garry Nieuwkamp

Simtars

Proudly serving the Queensland resources sector
and allied industries for over 30 years

Emergency Response

Simtars maintains an emergency response team capable of providing expert assistance to underground coal mines.

The emergency response team is on-call 24/7 and can provide the following at short notice in an emergency.

- Simtars mobile laboratory containing a 20 point tube bundle system
- GC with all necessary carrier and calibration gases
- Gas chemists to run the GCs, trend and interpret data
- Experienced engineers in underground coal mining techniques
- Remote support until equipment has been received at the mine

Mine Safety Technology Specialist Services

Simtars offers a range of specialist services to mining and related industries. Our team of experienced engineers, gas chemists and software engineers can provide specialist services including:

- Emergency exercise planning and facilitation
- Gas simulations for mining emergency exercises
- Level 2 exercises at individual mine sites
- Coal spontaneous combustion management advice
- Gas monitoring compliance audits
- Gas analysis for incident investigations
- Safety management plan reviews and audits
- Technical and scientific input to risk assessments
- Specialist control system programming

Gas monitoring and consulting services

Simtars is your one-stop-shop for mine gas monitoring systems and specialist advice. We offer turnkey mine gas monitoring solutions incorporating our Safegas, Segas Professional and Camgas systems, as well as a range of specialist gas consulting services

Our industry experts deliver world class health and safety training, research and testing services for your business and employees. Please call +61 7 3810 6333, email us on enquiries@simtars.qld.gov.au or visit www.simtars.qld.gov.au for more information.
